

Do any of these statements resonate with you?

- You often find yourself manually updating important data in your Google Workspace environment, such as adding new user profiles, updating Gmail signatures, and performing onboarding/ decommissioning actions.
- You rely on several disparate tools or multiple platforms that don't communicate with one another to fulfill your administrative duties.
- You perform a lot of repetitive tasks that could potentially be automated to save time.
- You can't seem to make your Google Workspace reports as granular as you'd like.
- You find yourself getting frustrated with one-size-fits-all approaches to Workspace management.

If you said yes, then you need gPanel Enterprise, Promevo's comprehensive Workspace management and security solution.

gPanel Enterprise

gPanel Enterprise goes above and beyond our Starter and Standard tiers, providing **advanced automation and integrations**, as well as data retention features.

APIs and a Rules Engine allow you to connect and extend automation across your Workspace apps. This tier also offers **data retention** beyond the standard 6 months available within the Google Admin console.
