

Do any of these statements resonate with you?

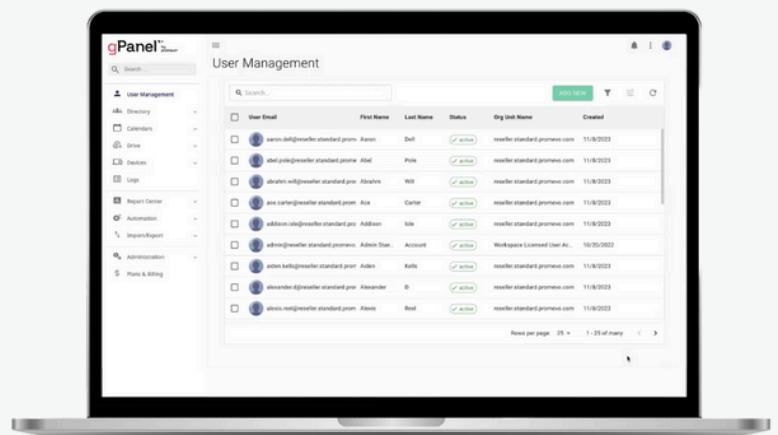

- You often find yourself manually updating important data in your Google Workspace environment, such as adding new user profiles, updating Gmail signatures, and performing onboarding/ decommissioning actions.
- You perform a lot of repetitive tasks that could potentially be automated to save time.
- You can't seem to make your Google Workspace reports as granular as you'd like.
- You find yourself getting frustrated with one-size-fits-all approaches to Workspace management.

If you said yes, then you need gPanel Standard, Promevo's comprehensive Workspace management and security solution.

gPanel Standard

gPanel Standard includes all of the features in Starter plus full reporting capabilities and automated onboarding and offboarding.

This tier includes **70+ reports** — aside from the expanded reports that are exclusive to Enterprise — as well as **user policy management and automated decommissioning**.
