RSVP: <https://promevo.com/google-next-happy-hour>

# gPanel<sup>®</sup> Software Makes Our Client's Worklife Better

## What is **gPanel**<sup>®</sup>?

**gPanel**<sup>®</sup> by Promevo is an exclusive Google Workspace management and reporting solution.

The intuitive centralized user management and security interface delivers peace of mind with a robust suite of features.

# Benefits for Our Clients

- Provides our customers time savings through Advanced User Administration and Admin Delegation, Automated Onboarding/Decommissioning Workflows
- Enhanced visibility through Unique Customizable Reporting
- Drives consistency in branding
- Operational efficiency gains through additional role delegation (Google Workspace Admins, Security Analysts, HR, Learning & Development, Marketing, First-line Managers)
- Superior Domain Security for their organization through granular security controls

## What our Customers are Saying

*Its presentation of data across Google Workspace is better than native tooling. There are various tasks where it is just faster to get answers via gPanel.*

*I can get in, and get out quickly and know exactly where all the controls are.* ”

*It makes managing individual user data easier. Especially info that requires you to log in as the user like vacation and autoresponders.*

## gPanel Enterprise Tier

gPanel provides administrators with all the tools they need to manage users effectively in their domain while safeguarding sensitive data. The platform goes above and beyond what is accessible in the Google Admin Console to enhance efficiency, security, and control over your data.

# gPanel<sup>®</sup> Enterprise

A more comprehensive way to manage  
your Google Workspace.

### With gPanel® Enterprise, you receive the following features:

- Centralized User Management
- Granular Visibility & Control
- Delegation
- Document Administration
- Bulk Operations
- Group Administration
- Permission Management
- Automation & Decommissioning
  - Admin Policy Generator
  - Decommissioning
  - Automated Decommissioning Process
  - Customized Policies
  - Custom Signature Template
- Compliance
- Secure Collaboration
- Reporting
- Billing
- Drive Management
- Risk Management
- Advanced Reporting\*
- gPanel® API\*

The gPanel® API allows admins to access system logs; automate onboarding, decommissioning, and standard policies; and seamlessly integrate with other applications, empowering them to retrieve more crucial data in a single response. Our new advanced reporting capabilities allow you to generate activities reports spanning a user's entire lifecycle — well beyond the 6-month report provided in Google Admin Console.

\*Not available in gPanel® Standard.

## Key Takeaways

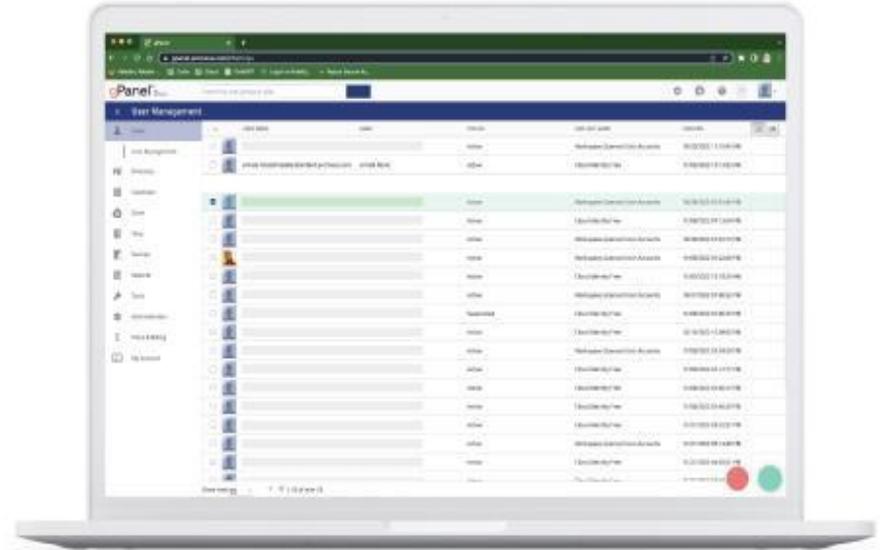

- Our new API enables admins to integrate gPanel with other software and streamline workflows, freeing them from these repetitive tasks
- Streamline Onboarding with gPanel API
- Simplify Offboarding with gPanel API
- New reports that contain data beyond the six months of information retained by Google

# gPanel API

# Problems gPanel API

- Our clients need the ability to perform the following tasks for Google Workspace in a more secure and transparent way.
- Automate user creation, policies, and decommissioning
- Automate consumption of audit logs
- Integrating third applications Example: Splunk, Okta, HR Systems, and Security Compliance Systems.

# Solution: gPanel APIs

An API (Application Programming Interface) is a way for two pieces of software to talk to each other.

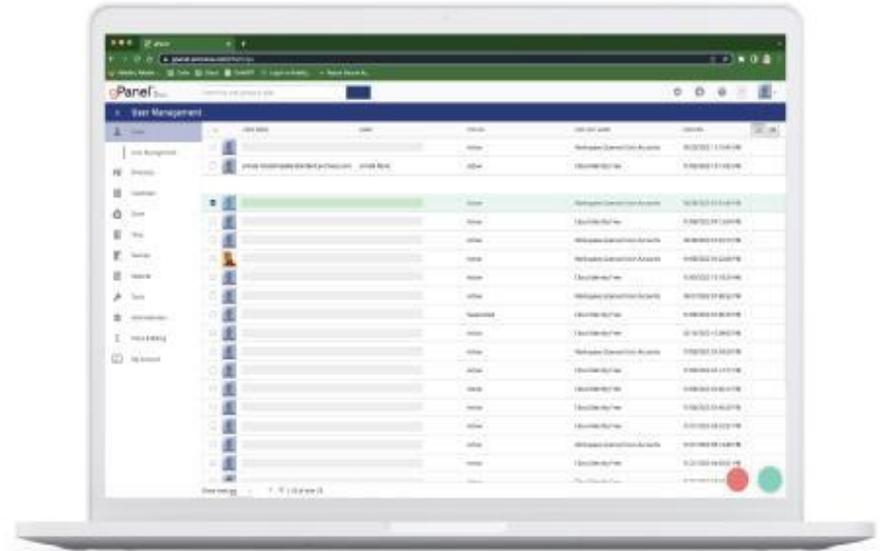

- Application Log Viewer
- Decommissioning Policy Invoker
- Onboarding Policy Invoker
- Standard Policy Invoker
- User Creator / Editor

# API Demo

# Advanced Reporting

# Problems

- Organizations that require more than 6 months history of documents shared externally. This encompasses current and off-boarded employees.
- Organizations require to know what documents longer than 6 months employees have shared externally especially when they are leaving the company.

# Solution: gPanel Advanced Reporting

## Why It's Important

- **Activities Report**
  - ❖ Admins have the ability to generate an activities report for documents that are **externally shared** that are more than 6 months old.
  - ❖ We will provide activities for the following:
    - My Drive
    - Shared Drive
    - Public Shares

## Why It's Important

- **Activities Decommissioning**
  - ❖ Admins have the ability to configure gPanel to send a report to the designated contact. The email details documents that an employee has **shared externally** for longer than 6 months.
  - ❖ We will provide activities for the following:
    - My Drive
    - Shared Drive
    - Public Shares

# Log Retention

## In a nutshell:

- The logs start being stored from the **first day** you are upgraded.
- Google's Logs go back 180 days. These logs will not be stored retroactively, however they will also be printed to the reports.
